Holiday Pay Manual Test Plan

Independence Day 2026 — Payroll week ending July 4

Holiday week plans · CSV upload · Holiday pay review at close

Overview

July 4, 2026 falls on Saturday. Company policy treats this holiday week differently for **4-day** (Mon–Thu, no Friday schedule) and **5-day** (includes Friday) employees. Before closing payroll, staff must complete the **Holiday week plan** for Independence Day 2026 on the Payroll page. Close payroll on **Tuesday, July 7, 2026** so the trailing bookend (Monday July 6) has passed.

The two halves of the system are tested separately. The **holiday week plan** sets the work hours attendance is measured against, and it applies automatically. **Holiday pay** is not automatic: the Close Payroll modal lists a suggestion per employee, and payroll approves or denies each one. Nothing is created or removed until you finalize.

Company schedule rules (this holiday)

- **4-day employees** — Thursday July 2 is the paid holiday (no work). Holiday pay hours = their prevailing shift length from schedule (typically ~10 hr).
- **5-day employees** — Thursday July 2 is a **4-hour work day**. Friday July 3 is closed; paid holiday on July 3 at their prevailing weekday rate (~9 hr).
- The holiday plan grid marks *which dates* are paid (any Holiday pay value > 0). Actual pay amounts come from each employee's schedule, not the number in the grid.
- Bookends use each employee's **effective** work days during the holiday week (plan intersected with their real schedule).
- Setting 5-day Thursday work to 4 hr is what stops a 4-hour Thursday from being recorded as an early departure against the normal 9-hour day.

Policy Under Test

- Payroll close is blocked until the Independence Day 2026 holiday week plan is complete.
- With no complete plan, the week produces no holiday pay suggestions at all.
- Part-time employees are suggested for denial and labelled Part-time.
- Full-time employees in their first 90 days are suggested for denial and labelled Under 90 days.
- Full-time employees must fully cover bookend shifts (work or planned leave); an unplanned absence (full or partial) on a bookend flags the row as a Miss and defaults it to Deny.
- Holiday pay appears only for rows approved in the modal, and a denied row also removes any holiday pay already recorded for that day.
- Payroll can override any default in either direction — approving a flagged row or denying an otherwise eligible one.
- PTO applies only to missed bookend hours, not to the holiday itself.

Key Dates

Date	Day	4-day template	5-day template
Jun 28 – Jul 1	Sun – Wed	Normal work; Wed Jul 1 = leading bookend	Same
Jul 2	Thu	Paid holiday (no work)	Work day (4 hr in plan)
Jul 3	Fri	Not scheduled / closed	Paid holiday (no work)
Jul 4	Sat	Unscheduled	Unscheduled
Jul 6	Mon	Trailing bookend	Trailing bookend
Jul 7	Tue	Recommended payroll close	Same

Payroll week under test: Sunday Jun 28 – Saturday Jul 4, 2026 (week ending **2026-07-04**).

Test Employees

ID	Profile	Schedule	Purpose
FT-4DAY	Full-time	Mon–Thu, 10 hr/day	Paid holiday Thu Jul 2 (~10 hr from schedule)
FT-5DAY	Full-time	Mon–Thu 9 hr + Fri 4 hr	Work Thu Jul 2 (4 hr); holiday Fri Jul 3 (~9 hr)
FT-LEAD	Full-time	Mon–Thu, 10 hr	Unplanned miss Wed Jul 1 → no holiday
FT-TRAIL	Full-time	Mon–Thu, 10 hr	Unplanned miss Mon Jul 6 → no holiday
FT-PTO	Full-time	Mon–Thu, 10 hr	Planned PTO Wed Jul 1 → still eligible
FT-NEW	Full-time	Mon–Thu, 10 hr	Hire < 90 days on Jul 2 → no holiday
PT	Part-time	Mon–Thu	Never eligible

Configure payroll names, schedules, hire dates, and is_part_time in admin before testing. Approve planned time-off for FT-PTO covering Wed Jul 1 before close.

Step 0 — Configure Holiday Week Plan

Payroll → **Holiday week plans** → Independence Day (2026). Set work and holiday-pay columns for the 4-day and 5-day templates. **Work** is what attendance is measured against. **Holiday pay** only marks which dates produce a suggestion (any value > 0); the amount offered at close comes from each employee's own schedule.

Date	4-day: Work	4-day: Holiday pay	5-day: Work	5-day: Holiday pay
Thu Jul 2	0	> 0 (marks paid)	4	0
Fri Jul 3	0	0	0	> 0 (marks paid)
Other days	Per normal template	0 unless paid	Per normal template	0 unless paid

Plan must show **Complete** before Close Payroll is allowed for week ending 2026-07-04.

Step 1 — Seed Trailing Bookend (Mon Jul 6)

Payroll → Week Ending **2026-07-11** → Download template. Edit Monday 2026-07-06 rows only, then upload.

Employee	Mon Jul 6 punches	Simulates
FT-4DAY, FT-5DAY, FT-LEAD, FT-PTO, PT	Full scheduled shift	Good trailing attendance
FT-TRAIL	Clear all punch cells	Unplanned trailing absence

Step 2 — Upload Holiday Week (Jun 28 – Jul 4)

Day	4-day employees	5-day (FT-5DAY)
Wed Jul 1 (leading bookend)	FT-4DAY/TRAIL/PT: full shift · FT-LEAD: empty · FT-PTO: empty if PTO approved	Full Wed shift per schedule
Thu Jul 2	Empty — paid holiday	4 hr shift punches
Fri Jul 3	Empty (not on schedule)	Empty — expect holiday pay from plan + schedule
Mon–Tue, Sat	Per schedule / empty as needed	Same

Empty punch cells delete that day's time entry (simulates unplanned absence).

Step 3 — Review Holiday Pay and Close (Tue Jul 7)

- Open Payroll → Week Ending 2026-07-04.
- Confirm no holiday-plan warning banner (plan must be complete).
- Resolve override / lunch review items in the Close Payroll modal.
- Scroll to **Holiday pay review** and check the suggested defaults against the table below before changing anything — the defaults themselves are part of the test.
- Leave FT-4DAY, FT-5DAY, and FT-PTO on **Approve**; confirm FT-LEAD, FT-TRAIL, FT-NEW, and PT are already on **Deny**.
- Note the warning on FT rows that the trailing bookend Mon Jul 6 falls in the next payroll week.
- Try the **Approve all eligible** and **Deny all with bookend miss** buttons, then reset the rows to the decisions above.
- Close Payroll and save the exported CSV.
- Verify Holiday - Paid occurrences: correct **date** and **hours** per employee schedule, and that denied employees have none.

Expected Suggestions Before You Decide

Employee	Paid date	Hours offered	Bookends	Eligibility	Default
FT-4DAY	Thu Jul 2	~10 hr	Both OK	Eligible	Approve
FT-5DAY	Fri Jul 3	~9 hr	Both OK	Eligible	Approve
FT-LEAD	Thu Jul 2	~10 hr	Wed Jul 1 Miss	Eligible	Deny
FT-TRAIL	Thu Jul 2	~10 hr	Mon Jul 6 Miss	Eligible	Deny
FT-PTO	Thu Jul 2	~10 hr	Both OK (PTO counts)	Eligible	Approve
FT-NEW	Thu Jul 2	~10 hr	Both OK	Under 90 days	Deny

Employee	Paid date	Hours offered	Bookends	Eligibility	Default
PT	Thu Jul 2	Per schedule	Both OK	Part-time	Deny

If a row is missing, has the wrong paid date, or offers hours that do not match the employee's shift length, stop and fix the holiday week plan or the schedule before closing.

Expected Results After Close

Employee	Holiday pay	Worked in week	Notes
FT-4DAY	~10 hr on Jul 2	Mon–Wed only	From schedule; perfect bookends
FT-5DAY	~9 hr on Jul 3	Mon–Wed + 4 hr Thu Jul 2	Thu worked short by plan — confirm **no Exchange variance** on Jul 2
FT-LEAD	0	As entered	Denied for leading unplanned miss on Wed Jul 1
FT-TRAIL	0	As entered	Denied for trailing unplanned miss on Mon Jul 6
FT-PTO	~10 hr on Jul 2	Mon–Tue + PTO Wed	Planned bookend OK
FT-NEW	0	As entered	Denied: under 90 days on holiday date
PT	0	Per schedule	Denied: part-time

Timing Checklist

When	Action
Before testing	Complete Independence Day 2026 holiday week plan on Payroll page
Before Jul 1	Create test employees; approve FT-PTO time-off for Wed Jul 1
Mon Jul 6	Upload week ending 2026-07-11 CSV (Mon bookend punches)
Mon–Tue Jun 29–Jul 1	Upload week ending 2026-07-04 CSV
Tue Jul 7	Re-upload Jul 4 CSV if needed; review the Holiday pay table, then Close Payroll for 2026-07-04
After close	Compare Holiday - Paid dates/hours to Expected Results After Close
